2D Midnight Beautiful Bromo

A popular tourist destination in East Java, Mount Bromo is an active volcano and is a part of the Tengger massif. The volcano itself is also part of the Bromo Tengger Semeru National Park, which covers a vast area consisting of one other mountain, Mount Semeru and four lakes. Mount Bromo sits on a plain called the “Sea of Sand.”

Day 1: Surabaya – Bromo

One of the most stunning views in Mount Bromo can actually be seen when the dawn breaks and the sun rises on the horizon. To ensure that you make it on time to view the sunrise, the tour group will leave Surabaya at approximately 10:00 PM (tentative). The trip will take around four hours.

Day 2: Bromo – Surabaya (L)

Upon arriving, all tour participants will be picked up using a Jeep to the sunrise viewing site. After the sun rises, the journey will continue to the caldera of Mount Bromo and “Teletubbies Hill.” Next, you will also visit the Sea of Sand, which is also known as “Pasir Berbisik” or the “Whispering Sand.” There will be a lot of opportunities for taking pictures and selfies. We will then start our trip back to Surabaya, making a stop in a restaurant for lunch on the way back.
